## ABSTRACT

Since 1969-70, the National Catholic Educational Association (NCEA) has published a statistical report on Catholic elementary and secondary schools in the United States. This year's report contains the core school enrollment and staffing data of the NCEA historical file. Also included are data on Chapter 1 services, extended care programs, school boards of education, and coeducational and single-sex schools. The first part of the report presents a summary of the demographic trends affecting both public and private education. This is followed by specifics about Catholic schools based on information submitted by 174 archdiocesan and diocesan offices of education and state Catholic conferences. Population trends show increasing numbers of students at preschool and elementary age levels, continuing the trend that has seen Catholic preschool enrollment increase by over 400% since 1982-83. In 1994-95 there were 8,293 Catholic schools serving 2,618,567 students. Of these schools, 3,830 were urban, and 1,022 were in the inner city. Most faculty members (89.8%) were lay men and women. Three appendixes provide detailed summary reports of educational statistics. (Contains 25 exhibits.) (SLD)

# PREFACE

Since 1969-1970 the National Catholic Educational Association (NCEA) has published a statistical report on Catholic elementary and secondary schools in the United States. Prior to this time extensive data did not exist for these and other private schools. This data was needed to understand this significant educational sector, to inform the discussion of other educational policy issues, including potential forms of federal and state aid, and to encourage and improve local management. With the assistance of the Carnegie Corporation of New York and the United States Office of Education, a data base on Catholic schools was established and remains available in annual publications of the NCEA through 1974-1975. In 1975, the NCEA and the Curriculum Information Center Incorporated published a report and directory of Catholic schools. This publication continues the database and is now produced in cooperation with Fisher Publishing Company of Silverthorne, Colorado, and Market Data Retrieval of Shelton, Connecticut.

This year's report contains the core school enrollment and staffing data of the NCEA historical file. Again this year, we have collected data in our survey on Chapter 1 services, extended care programs, school boards of education, coeducational and single-sex schools. The first part of the report presents a summary of the demographic trends impacting both public and private education. Comparisons are also made with other private schools and with the public sector. New this year is data gathered specifically on free-standing middle schools.

The report is based upon information submitted by 174 archdiocesan and diocesan offices of education and, in some instances, state Catholic Conferences. We are most grateful to these administrators and their staffs for their cooperation, resulting in a 100% response rate.

I am grateful to the members of the Data Bank Committee: Mr. Michael Guerra, Executive Director, Department of Secondary Schools; Regina Haney, OSF, Executive Director, National Association of Boards of Education; Dr. Robert Kealey, Executive Director, Department of Elementary Schools; Ms. Barbara Keebler, Director of Public Relations; and Mr. Frank X. Savage, Executive Director, Department of Chief Administrators of Catholic Education, for their suggestions and editorial assistance for this report. On behalf of this committee I wish to offer our special thanks to Ms. Mary Jo Milks, Ms. Leah Cosumano and Mr. Rick Gilbert for their outstanding service in collecting, organizing, and auditing the data which is the substance of this report. In addition, I wish to thank Ms. Mary Mahar of Fisher Publishing Company and the staff of Market Data Retrieval for their marvelous assistance and cooperation.

*NCEA Data Bank

National Catholic Educational Association*

# HIGHLIGHTS

- Population trends show increasing numbers of students at preschool and elementary age levels.
- Catholic preschool enrollment increased by over 400% since 1982-83.
- In 1994-95, there were 8,293 Catholic schools; of these 6,979 were elementary, 76 were middle, and 1,238 were secondary.
- In 1994-95 the total number of Catholic schools students was 2,618,567 - an increase of 41,722 students since last year.
- The percentage of minorities in Catholic schools has more than doubled since 1970-71 and continued to increase in 1994-95. It now stands at 23.1%.
- In 1994-95, 3,830 Catholic schools were located in urban areas; of these, 1,022 were inner-city schools.
- In 1994-95 non-Catholics represented 13.0% of Catholic school enrollment.
- In 1994-95 full-time equivalent faculty numbered 164,219.
- In 1994-95, 89.8% of full-time faculty were lay men and women; 7.8% were sisters; 1.0 % were brothers and 1.4% priests.
- In 1994-95 the pupil/teacher ratio in Catholic schools for grades PK-12 was 16.0; in elementary schools the ratio was 17.1, in middle schools the ratio was 11.7, and in secondary schools the ratio was 13.2.
- In 1994-95 there were 3,779 Catholic schools offering extended care programs.
- In 1994-95 students in 5,572 Catholic schools were eligible for Chapter 1 services, with students in 4,714 Catholic schools receiving Chapter 1 services.
- In 1994-95, 6,337 Catholic schools reported having a school board of education, or its equivalent.
- In 1994-95 Catholic schools included 100 male-only and 270 female-only schools.

# INTRODUCTION

In 1994-95, Catholic students and their teachers continued the success stories of the past. They now face the challenges of the present and of the future as they build on a sound foundation of commitment to the teachings of Christ, to the development of values, and to growth in academic excellence. Recent studies show that Catholic students excel in reading, science, and mathematical performance. A strong sense of community continues to be a distinctive quality of Catholic education. Dr. James Coleman, in his 1987 study, *Public and Private Schools: The Impact of Communities*, concludes that these characteristics are interrelated. Catholic high schools offer distinctive community support precisely because of the religious commitment of these schools, and this community support, in turn, helps to explain the remarkable success of Catholic schools with all students. One example: 83% of Catholic high school graduates go on to college.

A recent analysis of the National Educational Longitudinal Study of 1988 (NELS:88) by Dr. Penny Sebring, *A Profile of Eighth Graders in Catholic Schools*, confirms that this same community support is an equally significant factor in the performance of students in Catholic elementary schools. As a result, these students are more inclined to participate in extracurricular activities. The study also found that their teachers are caring and nurturing and there is more parental participation in the children's education than there is in public schools.

Independent research, together with studies commissioned by the National Catholic Educational Association (NCEA), shows that Catholic schools are more effective in educating minority and low-income students than are public schools. In the 1987 study referred to above, Dr. James Coleman, sociology professor at the University of Chicago, finds that, in general, Catholic schools seem to have done a better job of educating minority students. Black, Hispanic and other disadvantaged students at Catholic high schools not only have higher achievement levels, but the drop-out rates of these students is much lower than in public schools.

The findings of Dr. Sebring in her NELS:88 study support those of Coleman. This is especially evident in matters of equity where the gap between advantaged and disadvantaged students is significantly less in Catholic elementary schools than it is in public schools. She found this to be true of their performance in reading, mathematics, history/social studies and science. Black and Hispanic students do better in Catholic schools than in public schools and the gap between their performance and that of white and Asian students was smaller in Catholic schools. The same can be said for the performance of lower-income students.

In his study, Dr. Coleman used data from the U.S. Department of Education's High School and Beyond report, based on a sample of 1,015 American high schools. He reviewed such variables as family type, socioeconomic status, neighborhood, and the type of school. His findings are that pupils in Catholic schools, compared to pupils in public schools, show greater achievement in mathematics and verbal skills. Dr. Coleman determined that this difference could be explained by the greater number of standard math and English courses taken by students in Catholic schools comparable to students in public schools. The raw drop-out rate in public schools over a two-year period (of the study) for grades ten to twelve was 14.3%, of the private schools, 11.9%, and Catholic schools, 3.4%.

Coleman also found that for children of single-parent families in public schools or private schools, the drop-out rate rose to more than 1.5 times that in two-parent families. But there is no increase in the drop-out rate for children from single-parent families in Catholic schools. The natural support community that is offered by the parishes affiliated with the Catholic schools is an explanation for the better performance of these students.

NCEA studies, using data from the U.S. Department of Education's National Assessment of Educational Progress (NAEP), compared Catholic school students to the general school population for grades three, eight and ten. The 1983-84 study of reading proficiency revealed that there was a significant difference between the reading achievement of Catholic school students and all other students on all three levels. There also seemed to be very little difference between the achievement of white students and minority students in reading scores. (Lee, Valerie, National Assessment of Educational Progress Reading Proficiency: 1983-84 Catholic School Results and National Averages Final Report 1985.)

In the area of religious outcomes and values, the findings from *The Heart of the Matter* (Guerra, Donahue, and Benson, 1990) revealed that Catholic students in Catholic high schools tend to endorse marriage and family values, community involvement and service for others, commitment to church, the importance of religion more than Catholic students in public schools.

In comparing Catholic and public school scores in the most recent NAEP study of math and science, Dr. Valerie Lee of the University of Michigan, using the U.S. Department of Education's NAEP data, found that Catholic school students in grades three, seven and eleven do better in math and science. (Lee, Valerie, 1985-86 National Assessment of Educational Progress: Proficiency in Mathematics and Science, p. 7.)

In the NCEA 1986 study, *Catholic High Schools: Their Impact on Low Income Students*, the role of teachers is seen as a significant factor in the success of these students. The study states: "The strongest motivator affecting teachers in ... Catholic schools is the desire to teach in this kind of educational environment. The second strongest is their view of teaching as ministry, and third, their love of teaching. These motivations do much to explain why good things happen in ... Catholic high schools. Teachers confirm the informal reports of students that ... teachers often work with students outside class time. Teachers also overwhelmingly express respect and appreciation for their school colleagues" (p. 194). These findings reflect the work of Catholic school teachers in all schools.

In September 1992, NCEA released findings of a new Gallup survey which measured public opinion on the issues of parental choice of schools and the funding of school choice, as well as on the quality of education provided by U.S. schools.

The clear majority of the 1,239 adults surveyed — 70% — indicated support for a government-funded voucher system which would provide a certain amount of money for each child so that parents could send children to the public, private or parochial school of the parents' choice. When Americans were asked if they would be willing to see some of their tax money now going to public schools used to fund educational choice at any public, private or parochial school, three in five adults — 61% — did favor use of tax money for this purpose.

As part of the research project, NCEA also commissioned the Gallup Organization, Inc. to assess attitudes toward education in the U.S. by assigning grades (A through F). Asked to rate schools nationally, 62% of adults gave an A or B to Catholic schools.

In their 1993 study, *Catholic Schools and the Common Good* (Harvard University Press: 1993) Anthony Bryk of the University of Chicago, Valerie Lee of the University of Michigan and Peter Holland, Superintendent of Schools, Belmont, Massachusetts, conclude that Catholic schools are successful because they have a core curriculum which has a unifying influence on school life and student performance, a "communal organization" which encourages effective communication between students and adults, and an "inspirational ideology" which is the basis for the moral direction and purpose of each school.

As the above instances attest, there is mounting evidence of quality in Catholic schools. This report provides a statistical description of the numbers of students and teachers in U.S. Catholic elementary and secondary schools. Changes are constant, and the challenges to administrators, teachers, parents, and students become more complex and demanding each year. However, Catholic schools continue to enroll more than 50% of all private school students. In educational achievement they are pacesetters not only for other private schools, but for all schools in the nation.

# A SUMMARY OF DEMOGRAPHIC TRENDS IN PUBLIC AND PRIVATE EDUCATION: A CONTEXT

## U.S. POPULATION TRENDS

Current population trends are important to both public and private schools. According to the United States Department of Commerce, Bureau of Census, the birth rate (births/1000 persons) rose slightly during the past decade. Since the population is greater, the number of births has been increasing. The 16.8 birth rate produced 4,179,000 births in 1990, the most since 1960. However, a decline to 3,941,310 births in 1995 and to 3,874,892 in 2000 is projected.

**EXHIBIT 1**  
**Population and Birth Rate:**  
**1955 - 2000**

Reported	Population	Births	Birth Rate
1955	165,069,000	4,097,000	24.8
1960	179,975,000	4,257,850	23.7
1965	193,460,000	3,760,358	19.4
1970	203,302,000	3,731,386	18.4
1975	215,465,000	3,144,198	14.6
1980	226,846,000	3,612,258	15.9
1985	238,736,000	3,760,561	15.8
1990	248,709,873	4,179,000	16.8
Estimated			
1995	262,754,000	3,941,310	15.0
2000	274,815,000	3,874,892	14.1

SOURCE: Bureau of Census, U.S. Department of Commerce, April 1994.

## SCHOOL-AGE POPULATION

According to the National Center for Education Statistics, these population trends are reflected in the increasing numbers of students at preschool, elementary and secondary levels. Preschool age students were increasing in 1980. Growth has been slower than in elementary and secondary categories, and after 2000 is projected to decrease. This upward trend in elementary students began in 1986. In 1991 secondary schools began to show an increase. The steady increase of students in these three age brackets is detailed in Exhibit 2.

**EXHIBIT 2**  
**Ages of Students**

Reported	Preschool (3-5)	Elementary (5-13)	Secondary (14-17)
1980	9,546,000	31,091,000	16,144,000
1985	10,652,000	29,892,000	14,888,000
1989	11,036,000	31,413,000	13,536,000
1990	11,033,000	31,996,000	13,313,000
1991	11,132,000	32,494,000	13,424,000
1992	11,308,000	33,006,000	13,661,000
1993	11,504,000	33,424,000	13,802,000
Estimated:			
1994	11,878,000	33,870,000	14,088,000
1995	12,227,000	34,263,000	14,591,000
1996	12,344,000	34,868,000	14,933,000
2000	11,887,000	36,547,000	15,811,000
2005	11,670,000	36,843,000	16,947,000

SOURCE: *Projections of Education Statistics to 2005*, National Center for Education Statistics, 1995, pp. 172-73

## ENROLLMENT IN PUBLIC AND PRIVATE SCHOOLS

The following exhibit shows a substantial steady increase in preprimary enrollment for ages 3, 4, and 5 in both private and public schools between October 1970 and October 1993, according to the National Center for Education Statistics.

### EXHIBIT 3: Preprimary Enrollment by Attendance Status: 1970-1993

SOURCE: Digest of Educational Statistics 1994, National Center for Education Statistics, p. 46

Elementary school enrollment dropped during the 1970s in both public and private schools, but underwent little or no change in the first half of the 1980s. High school enrollment in public schools rose during the early-mid 1970s but then turned downward. Private school enrollment at the high school level changed little from 1970-1994. Exhibits 4 and 5 show these enrollment levels.

### EXHIBIT 4: Public and Private School Enrollment by Grade Level: 1970-2004

SOURCE: The Condition of Education 1994, National Center for Education Statistics, p. 111

**EXHIBIT 5**  
**Public and Private School Enrollment:**

2005	55,871	49,651	88.9	6,220	11.1

SOURCE: *Projections of Education Statistics to 2005*, National Center for Education Statistics, 1995, p. 9.

## TEACHERS AND PUPIL-TEACHER RATIOS BY LEVEL

Since 1981, there has been a steady increase in the number of teachers, K through 12, in both public and private schools. At the same time, overall K-12 pupil/teacher ratios continued to decline after 1981, as is evidenced in Exhibit 6.

This is the fourth year that NCEA has compiled data on both full and part-time staff positions in addition to collecting data for students from PK-12. Therefore, the data since 1991-92 reflect these changes in the pupil/teacher ratios.

The overall pupil teacher ratio in Catholic schools for PK-12 in 1994-95 was 16.0. In Catholic elementary schools for 1994-95, the ratio was 17.1; in middle schools, it was 11.7; in Catholic secondary schools, it was 13.2. In Catholic elementary schools for 1993-94, the ratio was 18.1 and in secondary schools, 13.0. Middle schools were not reported as a separate group previous to the 1994-95 school year.

## EXHIBIT 6

### Public and Private Schools: Teacher and Pupil/Teacher Ratios

#### Number of Teachers:

Year	K to 12	Elementary	Secondary
1986	2,592,000	1,521,000	1,071,000
1987	2,632,000	1,564,000	1,068,000
1988	2,668,000	1,604,000	1,064,000
1989	2,734,000	1,662,000	1,072,000
1990	2,753,000	1,680,000	1,073,000
1991	2,787,000	1,713,000	1,074,000
1992	2,821,000	1,746,000	1,075,000
1993	2,873,000	1,773,000	1,100,000

#### Estimated:

1994	2,912,000	1,751,000	1,161,000
1995	2,971,000	1,783,000	1,187,000
1996	3,021,000	1,813,000	1,208,000
1997	3,084,000	1,850,000	1,234,000
1998	3,138,000	1,883,000	1,256,000
1999	3,189,000	1,912,000	1,277,000
2000	3,228,000	1,936,000	1,292,000
2001	3,259,000	1,953,000	1,306,000

# CATHOLIC EDUCATION 1994-95

## NUMBER OF SCHOOLS

In 1994-95, there were 8,293 Catholic schools in this country; of these, 6,979 are elementary, 76 are middle and 1,238 are secondary. In the 1980s, in some instances, the number of Catholic schools mirrored the demographic movements throughout the country. Where appropriate, especially in urban and suburban areas, consolidation was a significant factor in the realignment of Catholic schools. While the number of schools continues to decrease through closing and consolidation, new schools continue to open. In 194-95 31 schools opened, primarily at the elementary level.

## (1) REGIONAL DISTRIBUTION

The National Catholic Educational Association divides the nation statistically into the following six geographical regions:

<b>New England:</b>	Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont
<b>Mideast:</b>	Delaware, District of Columbia, Maryland, New Jersey, New York, Pennsylvania
<b>Great Lakes:</b>	Illinois, Indiana, Michigan, Ohio, Wisconsin
<b>Great Plains:</b>	Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota
<b>Southeast:</b>	Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, West Virginia
<b>West/Far West:</b>	Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah, Washington, Wyoming.

Exhibit 7 presents the number of schools by region and Exhibit 8 the percentages of this distribution. It is evident from the latter that the Mideast and Great Lakes regions have had more than 50% percent of the total number of Catholic schools in the past ten years. The West Far West region shows continued growth. Free-standing middle schools are included in this year's report, reflecting a relatively recent trend and focus in both public and private education.

NOTE: Percentages may not total 100% due to rounding.

## (2) TYPES OF SCHOOLS

The types of Catholic schools are determined by the authority of their administration. Under this classification there are four: parish (those administered by a single parish), inter-parish (those administered by two or more parishes), diocesan (those administered by the diocesan office of education), and private (those administered by a religious order or a private corporation). Exhibit 9 indicates that most elementary schools are parish schools; however, between 1983-84 and 1994-95, the growth in the number and percentage of elementary inter-parish schools continued. In this first year of reporting, 50% of middle schools were inter-parish schools. This growth underlines the reorganization of Catholic education through consolidation. Most secondary schools are either private or diocesan however. Exhibit 9 shows a slight increase in the percentage of inter-parish and private schools over the past decade.

**EXHIBIT 9: Types of Schools**

### Elementary

### Secondary

\*Middle schools reported as a separate group beginning in 1994-95.

### (3) LOCATION OF SCHOOLS

During the 1980s and 1990s, the highest percentage of elementary and secondary schools was found in urban areas; however the increase in suburban schools nationally in the past ten years is significant. The number of urban suburban and rural elementary schools has risen since last year. Of 8,293 schools, 3,781 are in urban areas; of these, 1,008 are in inner-city settings. The high percent of middle schools reflects the consolidations of elementary schools that has taken place in those areas (46.1 % urban, 18.4% inner-city).

# ENROLLMENT

## (1) GROWTH TRENDS FOR PRESCHOOL AND KINDERGARTEN

In the past decade, preschool enrollment has increased by over 400%. This sharp increase in preschool enrollment reflects the response of Catholic schools to the needs of parents. The number of kindergarten students also continued to increase, as detailed in Exhibit 11.

## (2) ENROLLMENT BY GRADE LEVEL

Catholic school enrollment by grade level from preschool to grade 12 was consonant with U.S. population trends, both actual and projected, as shown below in Exhibit 12. It is noteworthy this year every state and the District of Columbia showed an increase at some level (statistics for individual dioceses and states may be found in Appendix B).

**EXHIBIT 12**  
**Enrollment by Grade Level**

Grade Level	1982-83		1993-94		1994-95	
	Pupils	%	Pupils	%	Pupils	%

- \*\* Since 1991 NCEA statistics for total enrollment have included the number of Pre-K students
- \*\*\* Beginning in 1995, NCEA has collected information by the type of school. The grade levels following the type of school signify the lowest and highest grades in these types of schools.

NOTE: Percentages may not total 100% due to rounding.

223  
1995

## ENROLLMENT BY REGION

In enrollment by region, as shown in Exhibits 13 and 14, the Mideast and Great Lakes continue to show more than half of total enrollment in Catholic schools. However, every region showed an increase in overall enrollment for 1994-95, most notably in the Southeast and West/Far West regions.

### EXHIBIT 13 Enrollment by Region

Prior to 1991-92, statistics for total enrollment did not include Pre-K enrollment. Therefore, figures listed below for United States enrollment before 1991-92 will correspond to the total minus PK figure in Exhibit 12; the post 1991-92 figures will correspond to the total with the PK figure included.

Elementary	1983-84	1993-94	1994-95
New England	143,000	117,974	116,402

#### (4) ENROLLMENT IN KEY STATES

As detailed in Exhibit 15, ten states accounted for more than two-thirds of Catholic school enrollment. New York, Pennsylvania, California, Illinois and Ohio — the top five — had 46.0% of this enrollment.

**EXHIBIT 15**  
**Student Enrollment: Ten Largest States**

State	1983-84	1993-94	1994-95
New York	382,910	299,197	300,288
California	257,567	249,855	252,417
Pennsylvania	296,730	243,695	242,617
Illinois	264,412	219,453	219,173
Ohio	212,414	179,754	190,080

Wisconsin	99,302	82,938	82,860
Largest States	2,013,832	1,696,995	1,717,033
United States	2,958,154	2,576,845	2,618,567
Percent	68.1%	65.9%	65.6%

## (5) ENROLLMENT IN KEY DIOCESES

The twenty largest dioceses serve almost 50% of the total enrollment in Catholic elementary and secondary schools, as illustrated in Exhibit 16. These dioceses are larger than the metropolitan area of the same name. Most of the enrollment in these 20 key dioceses does come from the major city and the immediate suburbs of that area.

**EXHIBIT 16**  
**Enrollment in Key Diocese**

Diocese	1983-84	1993-94	1994-95
Chicago	178,706	141,925	140,209
Philadelphia	113,027	124,133	122,982
New York	125,831	106,070	107,144
Los Angeles	109,801	102,141	102,366

All Dioceses	2,968,154	2,576,845	2,618,567
Percent	49.0%	47.3%	47.0%

## (6) ENROLLMENT OF ETHNIC MINORITIES

Catholic schools, especially in urban areas, continue to serve increasing numbers of ethnic minority students. In 1970-71 minority enrollment was 10.8% of enrollment; in 1994-95 it had more than doubled to 23.1%. Exhibit 17B shows percentages since 1983-84. Elementary schools have a minority enrollment of 23.2%; middle schools 25%; and secondary 22.8%.

**EXHIBIT 17A**  
**Catholic School Enrollment by Ethnic Background—1994-95**

	Elementary	Middle	Secondary	All Schools

Total	100.0	100.0	100.0

## (7) ENROLLMENT OF NON-CATHOLICS

Most Catholic school students are Catholic. However, there has been a significant increase of non-Catholic students — from 10.6% in 1982-83 to 13.0 in 1994-95 — as is shown in Exhibits 18 and 19. Middle schools show the highest percentage of non-Catholic enrollment at 18.5%. Secondary schools, 16.6% in 1994-95, and elementary schools have 11.8%. The Southeast and West/Far West regions have the highest percentages at both the secondary and the elementary levels in 1994-95; in the middle school the Mideast and West/Far West had the highest percentages.

**EXHIBIT 18**  
**Non-Catholic Enrollment—1994-95**

	Elementary	Middle	Secondary	All Schools
New England	12,751	311	6,357	19,419

# STAFFING OF CATHOLIC SCHOOLS

## (1) NUMBER OF TEACHERS

In 1994-95, the total, full-time equivalent (FTE) teaching staff in Catholic elementary, middle and secondary schools was 164,219. 1991 was the first year that both full and part-time teaching staff totals were collected. Consequently, the FTE reflects the number of part-time staff positions and must be kept in mind when comparing to previous years' staffing totals. There were 116,494 elementary school teachers, 1,126 middle school teachers and 46,599 secondary school teachers. Of these, 89.8% are lay teachers. Exhibit 20 shows the number of sisters, brothers, priests and lay teachers; Exhibit 21 shows the percentages. The middle school numbers are not shown since this is the first year reporting them apart from elementary schools. They are included in the "All School" numbers.

**EXHIBIT 20: Full-Time Equivalent Teaching Staff**

\* Data concerning lay men and women is not available for the base year, 1982-83, this number reflects total lay teachers.

\*\* Since 1991-92 FTE staffing totals include full and part-time figures.

\*\*\* Since 1991-92 data collection includes the statistical breakdown of brothers/priests into two distinct categories.

# SELECTED PROGRAMS IN CATHOLIC EDUCATION

## EXTENDED CARE PROGRAMS

The 1994-95 data collection of Catholic elementary schools revealed that of 6,979 elementary schools, 3,799 had extended care programs. Exhibit 22 illustrates the breakdown by regions. See Appendix C for a summary report by region and state.

**EXHIBIT 22**  
**Schools with Extended Care Programs**

Region	Number
New England	241
Mideast	937
Great Lakes	798
Plains	310
Southeast	579
West Far West	912
Total	3,777

## CHAPTER 1 SERVICES

The 1994-95 collection of data from Catholic schools revealed that of 5,572 elementary and secondary schools with students eligible for Chapter 1 services, 4,714 schools had students receiving these services. Exhibit 23 shows the number of schools with students receiving Chapter 1 services by region. For a complete summary by region and state refer to Appendix C.

**EXHIBIT 23**

Southeast	568	466
West Far West	804	680
Total	5,572	4,714

## SCHOOL BOARDS OF EDUCATION

The 1994-95 collection of data from Catholic Elementary, middle and secondary schools revealed that of 8,293 schools, 6,337 reported having an existing school board, commission or council of education. Exhibit 24 illustrates the breakdown by regions. See Appendix C for a summary report by region and state.

## COED/SINGLE SEX SCHOOLS

The 1994-95 collection of data from Catholic Elementary and secondary schools revealed that of 8,293 schools, 8,089 schools responded to the question on the gender composition of the school. 7,625 schools are coeducational, 196 schools are all-male, and 268 schools are all-female. Exhibit 25 illustrates the breakdown by regions. See Appendix C for a summary report by region and state.

## STATES WITH ENROLLMENT INCREASES IN ELEMENTARY (E) AND/OR SECONDARY (S) SCHOOLS 1994-95

### New England ..... 6

Connecticut (E & S)  
Maine (S)  
Massachusetts (S)  
New Hampshire (E & S)  
Rhode Island (S)  
Vermont (E)

### Mideast ..... 6

Delaware (S)  
District of Columbia (E & S)  
Maryland (S)  
New Jersey (E & S)  
New York (E)  
Pennsylvania (S)

### Great Lakes ..... 4

Illinois (S)  
Indiana (E & S)  
Michigan (E & S)  
Ohio (E & S)  
Wisconsin (S)

### Plains ..... 7

Iowa (S)  
Kansas (E & S)  
Minnesota (E & S)  
Missouri (S)  
Nebraska (S)  
North Dakota (S)  
South Dakota (E)

### Southeast ..... 12

Alabama (E & S)  
Arkansas (E & S)  
Florida (E & S)  
Georgia (S)  
Kentucky (E & S)  
Louisiana (S)  
Mississippi (S)  
North Carolina (E & S)  
South Carolina (S)  
Tennessee (E & S)  
Virginia (E & S)  
West Virginia (E & S)

### West & Far West ..... 15

Alaska (E & S)  
Arizona (E & S)  
California (E & S)  
Colorado (E)  
Hawaii (S)  
Idaho (E & S)  
Montana (E)  
Nevada (E & S)  
New Mexico (S)  
Oklahoma (S)  
Oregon (E & S)  
Texas (E & S)  
Utah (S)  
Washington (E & S)  
Wyoming (E & S)
